ANNUAL INDEX TO THE TEXAS TRANSPORTATION RESEARCHER ISSUES OF 1969 BY SUBJECT AND AUTHOR

A

A&M Graduates Are Appointed to Top Highway Posts, Volume 5, No. 2, Page 7.

ADTSA Board, Driver Education Specialist Is Elected to, Volume 5, No. 3, Page 11.

Aggregates, Blending of Lightweight and Natural, Is Studied at TTI, Volume 5, No. 1, Page 12.

Air Transportation Plan for Texas Is Subject of New Research, Volume 5, No. 4, Page 2.

Allstate Award for Highway Safety Work, TTI Receives, Volume 5, No. 1, Page 9.

42nd Annual Meeting at Texas A&M, Highway Engineers Hold, Volume 5, No. 1, Page 2.

B

Buhr, J. H., Drew, D. R., and Whitson, R. H., Design of Digital Computer Control Systems for Improving Freeway Traffic Operations, Volume 5, No. 2, Page 12.

Buhr, J. H., Kirk, B. M., Radke, M. L., and Drew, D. R., A Freeway Traffic Control System for Moving Vehicle Merging, Volume 5, No. 2, Page 8.

C

Carvell, James D., Computerized Traffic Control for Corridor Operation of Dallas Expressway, Volume 5, No. 4, Page 8.

Computerized Evaluation Involves Roadway Environment, Volume 5, No. 2, Page 13.

Computerized Rate Retrieval, Motor Freight Industry Hopes for Refinement of, Volume 5, No. 1, Page 9.

Computerized Traffic Control for Corridor Operation of Dallas Expressway, James D. Carvell, Volume 5, No. 4, Page 8.

Crash Tests Prove Worthiness of Modular Crash Cushion, Volume 5, No. 3, Page 1.

D

Distinguished Service Award Is Presented to Dr. T. J. Hirsch, Volume 5, No. 3, Page 1.

Drew, Donald R., Buhr, J. H., Whitson, R. H., Design of Digital Computer Control Systems for Improving Freeway Traffic Operations, Volume 5, No. 2, Page 12.

Drew, Donald R., Kirk, B. M., Radke, M. L., and Buhr, H. H., A Freeway Traffic Control System for Moving Vehicle Merging, Volume 5, No. 2, Page 8.

Driver Communications, Woods, Donald L. and Rowan, Neilon J., Volume 5, No. 1, Page 14.

Durability of Aggregates, Latest Structural Research Findings Show, Volume 5, No. 2, Page 6.

E

Earthern Home Manual, AID Makes Fourth English Printing of, Volume 5, No. 1, Page 13.

Economic Advantages, Freeway Surveillance and Control Shows, Volume 5, No. 2, Page 9.

Effective Use of Rapid Bus Transit on Urban Freeways, Volume 5, No. 2, Page 3.

Engineer Awards Go to Two for Education and Research, Volume 5, No. 2, Page 1.

F

Federal Highway Administrator Is Honored With Alumni Award, Volume 5, No. 3, Page 2.

Flexible Pavement Behavior Is Subject of Study, Volume 5, No. 2, Page 11.

G

Gallaway, Bob M., Skid Resistant and Polishing Type Aggregates, Volume 5, No. 1, Page 3.

Gay, J. N., Buhr, J. H., Drew, D. R., and Whitson, R. H., Design of Digital Computer Control Systems for Improving Freeway Traffic Operations, Volume 5, No. 2, Page 12.

Goodknight, John C. and Stover, Vergil G., Well Designed Direct Access Driveways Improve Traffic Operations and Commerce, Volume 5, No. 3, Page 8.

H

Horn, Louis J., Wave Equation Serves in Computer Solution of Various Types of Pile Driving Problems, Volume 5, No. 4, Page 6.

I

Industrial Economist Discusses Industrial Development for Texas Conditions, Volume 5, No. 2, Page 5.

Instrumented Car Serves Research Involving Driving Tasks, Volume 5, No. 4, Page 12.

K

Kirk, B. M., Buhr, J. H., Radke, M. L., and Drew, D. R., A Freeway Traffic Control System for Moving Vehicle Merging, Volume 5, No. 2, Page 8.

M

Merit Awards from John S. Redditt, Two Highway Engineers Receive, Volume 5, No. 1, Page 11.

Moving Vehicle Merging, A Freeway Traffic Control System for, Buhr, J. H., Kirk, B. M., Radke, M. L., and Drew, D. R., Volume 5, No. 2, Page 8.

Multilevel Approach to the Design of a Freeway Control System Is Suggested, A., Volume 5, No. 3, Page 7.

N

New Instrument Measures Seasonal Changes in Flexible Pavements, Volume 5, No. 1, Page 13.

NGI System Describes Design Terrain Mathematically, Volume 5, No. 1, Page 1.

O

Official Is Chosen to Direct Engineering Research at Texas A&M, Volume 5, No. 2, Page 2.

Offshore Technology Papers of A&M Are Presented, Volume 5, No. 3, Page 7.

Olson, Robert M., Tentative Service Requirements for Safer Bridge Railings, Volume 5, No. 3, Page 3.

P

Paul Gray Hoffman Award of ASF Is Presented to TTI Researchers for Leadership in Safety, Volume 5, No. 1, Page 1.

Pavement Research Provides Data for Satellite Road Test Teams, Volume 5, No. 4, Page 1.

R

Radke, M. L., Buhr, J. H., Kirk, B. M., and Drew, D. R., A Freeway Traffic Control System for Moving Vehicle Merging, Volume 5, No. 2, Page 8.

Rail-Highway Grade Crossings, Diagnostic Team Seeks to Boost Safety at, Volume 5, No. 1, Page 10.

Ramp Capacity and Service Volume Relationships to Freeway Control are Studied, Volume 5, No. 3, Page 12.

Receives ASCE Appointment, Dean Benson, Volume 5, No. 1, Page 2.

Reduced Crash Records, Slip Base Lighting Supports Found to Produce, Volume 5, No. 1, Page 9.

Regional Right-of-Way Group Discussed Land Acquisition, Volume 5, No. 4, Page 5.

Regulations of Access Along Arterials, by Vergil G. Stover, Volume 5, No. 4, Page 3.

Research Center Operates With Many Facilities, Volume 5, No. 2, Page 13.

Rotary Kiln Serves Quests, Volume 5, No. 1, Page 16.

Rowan, Neilon J. and Woods, Donald L., Driver Communications, Volume 5, No. 1, Page 14.

S

Safer Bridge Railings, Tentative Service Requirements for, by Robert M. Olson, Volume 5, No. 3, Page 3.

Safety Provisions for Overhead Sign Structures Are Sought by Sponsoring Group, Volume 5, No. 4, Page 1.

Safety Researcher Dies in Head-On Collision On Highway, Volume 5, No. 3, Page 4.

Saves Lives in Collisions, Oil Drum Cushion Device, Vol. 5, No. 1, Page 8.

Several Sealants Show Promise for Treatment of Reinforced Concrete Bridge Decks, Volume 5, No. 3, Page 11.

Shipping, Transport Officials Attend Conference on Emergency Controls, Volume 5, No. 2, Page 14.

Smith, Harry L., The Photoelastic Method and the Stress and Strain Distribution in a Soils Model, Volume 4, No. 3, Page 4.

Soil Mechanics Engineers Hold International Meeting at A&M, Volume 5, No. 4, Page 5.

Stover, Vergil G., Regulation of Access Along Arterials, Volume 5, No. 4, Page 3.

Stover, Vergil G., and Goodknight, John C., Well Designed Direct Access Driveways Improve Traffic Operations and Commerce, Volume 5, No. 3, Page 8.

Special Overlays for High Skid Resistance, New HRB Subcommittee, Head Reports on, Volume 5, No. 1, Page 10.

T

The Photoelastic Method and the Stress and Strain Distribution in a Soils Model, by Harry L. Smith, Volume 5, No. 3, Page 4.

Transportation Engineering Attracts New Students, Volume 5, No. 4, Page 2.

V

Visual Communications Systems of Nation's Highways Are Evaluated, Volume 5, No. 4, Page 11.

W

Wave Equation Serves in Computer Solution of Various Types of Pile Driving Problems, by Louis J. Horn, Volume 5, No. 4, Page 6.

Well Designed Direct and Access Driveways Improve Traffic Operations and Commerce, by Vergil G. Stover and John C. Goodknight, Volume 5, No. 3, Page 8.

Whitson, R. H., Buhr, J. H., Drew, D. R., and Gay, J. N., Design of Digital Computer Control Systems for Improving Freeway Traffic Operations, Volume 5, No. 2, Page 12.

Wins in ASCE Competition, Volume 5, No. 3, Page 11.

Woods, Donald L. and Rowan, Neilon J., Driver Communications, Volume 5, No. 1, Page 14.
